

# Deferred Neural Lighting: Free-viewpoint Relighting from Unstructured Photographs—Supplemental Material—

DUAN GAO, BNRist, Tsinghua University and Microsoft Research Asia

GUOJUN CHEN, Microsoft Research Asia

YUE DONG, Microsoft Research Asia

PIETER PEERS, College of William & Mary

KUN XU, BNRist, Tsinghua University

XIN TONG, Microsoft Research Asia

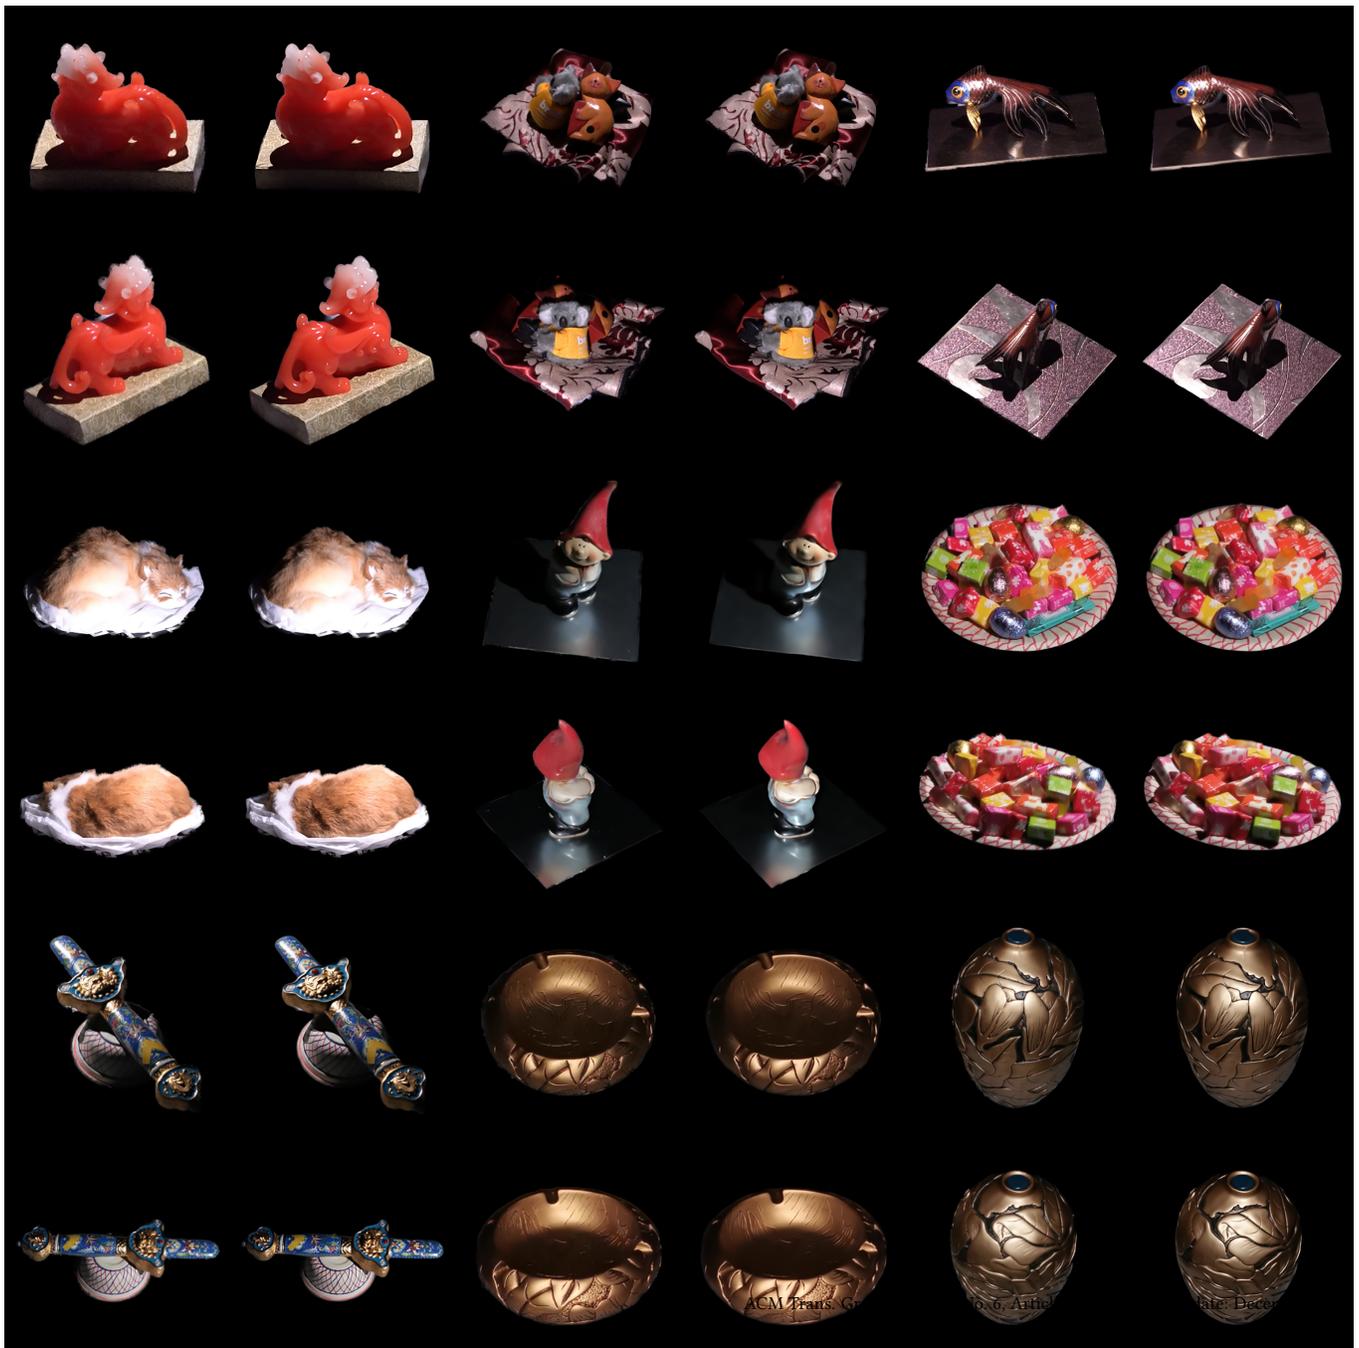

Fig. 1. Additional qualitative comparisons between captured scenes relit (right) for novel viewpoints and lit from novel lighting directions (not part of the training data) and captured reference photographs (left).

**ACM Reference Format:**

This supplementary material includes additional experimental results.

Figure 1 provides additional qualitative comparisons between captured scenes relit for novel viewpoints and lit from novel lighting directions and captured reference photographs.

Figure 2 provides additional comparisons to the relighting method of Xu *et al.* [2018] on our synthetic test scenes. For additional comparisons to [Xu *et al.* 2018], [Nam *et al.* 2018] and extensions of [Thies *et al.* 2019] please refer our supplementary video.

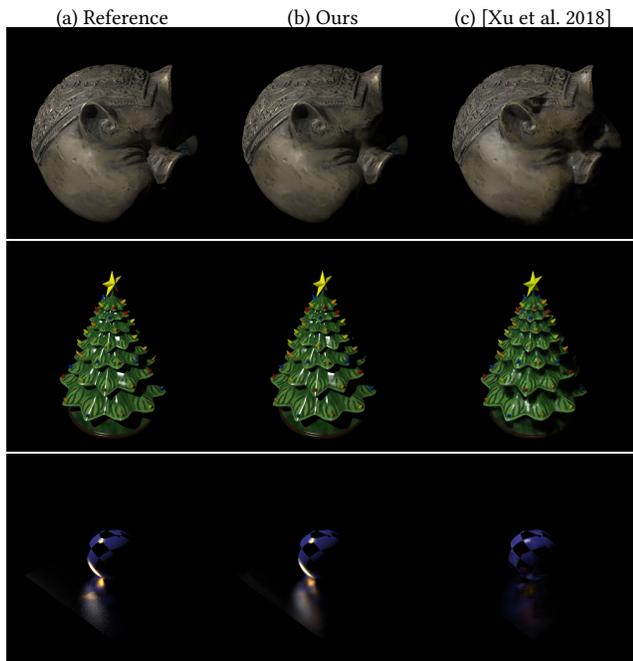

Fig. 2. Additional comparison to the learning-based relighting method of Xu *et al.* [2018].
